

BrightTV Viewership Analytics Project

Project Overview

BrightTV's CEO has set a strategic objective to increase the company's subscription base during the current financial year. To support this objective, the Customer Value Management (CVM) team requires data-driven insights into user behavior, viewing trends, and content consumption patterns.

This project analyzes BrightTV subscriber profiles and viewing transaction data to identify key drivers of platform engagement, uncover consumption trends, and recommend initiatives that can improve customer retention and attract new subscribers.

The analysis will focus on understanding how demographic factors, geographic location, and content preferences influence viewing behavior and subscription growth opportunities. The final deliverable includes visualizations, dashboards, and strategic recommendations for business stakeholders.

Business Problem

BrightTV aims to grow its subscriber base but currently lacks sufficient insights into viewer behavior and content consumption patterns.

Key business challenges include:

- Identifying factors that influence content consumption.
- Understanding user viewing trends.
- Determining periods of low platform engagement.
- Recommending content strategies to improve consumption during low-usage periods.
- Identifying initiatives to acquire and retain subscribers.

By leveraging subscriber and viewing data, BrightTV can make informed decisions to improve customer engagement and drive subscription growth.

Project Objectives

The primary objectives of this project are:

1. Analyze User Trends

- Understand customer demographics.
- Analyze subscriber distribution across provinces.
- Examine age and gender patterns.

2. Analyze Usage Trends

- Identify peak consumption periods.
- Analyze viewing activity by day and time.
- Measure user engagement levels.

3. Identify Drivers of Consumption

Determine how factors such as:

- Age
- Province
- Gender
- Content type
- Viewing time

influence content consumption.

4. Improve Consumption

Identify:

- Days with low viewership.
- Content categories likely to increase engagement during low-consumption periods.

5. Grow the User Base

Provide strategic recommendations that support:

- Subscriber acquisition.
- Customer retention.
- Customer engagement.
- Product growth.

Dataset Description

The project uses two primary datasets:

User Profiles Dataset

Contains subscriber information including:

- User ID
- Name
- Age
- Gender

- Race
- Province
- Email Address
- Social Media Handle

Viewer Transactions Dataset

Contains customer viewing session information including:

- Viewing session records
- Watching activity
- Session timestamps
- Content consumption metrics

Important Note: All timestamps are recorded in UTC and must be converted to South African Standard Time (SAST) before analysis. [\[1782214136...Case Study | PDF\]](#)

Expected Deliverables

Data Cleaning

- Handle missing values.
- Remove duplicates.
- Validate demographic information.
- Convert timestamps from UTC to SAST.

Exploratory Data Analysis (EDA)

- User demographics analysis.
- Provincial subscriber distribution.
- Viewing trend analysis.
- Peak and off-peak consumption analysis.

Data Visualization

Interactive charts showing:

- Subscriber demographics.
- Viewing patterns.
- Consumption trends.
- Geographic distribution.

Dashboard

Executive dashboard presenting:

- Key KPIs.
- User trends.
- Consumption patterns.
- Subscriber growth recommendations.

Final Presentation

A 20-minute stakeholder presentation addressing:

- User and usage trends.
- Factors influencing consumption.
- Content recommendations.
- User growth initiatives.

Key Analytical Questions

1. Who are BrightTV's most engaged customers?
2. Which provinces generate the highest viewership?
3. Which age groups consume the most content?
4. When does peak consumption occur?
5. What factors influence content consumption?
6. Which days experience low engagement?
7. What content should be promoted during low-consumption periods?
8. How can BrightTV increase subscriptions and retention?

Success Criteria

The project will be considered successful if it provides:

- Clear insights into subscriber behavior.
- Actionable recommendations for content strategy.
- Opportunities to increase user engagement.
- Data-driven initiatives for subscriber growth.
- Executive-level reporting that supports strategic decision-making
